

# WCRP Workshop on CMIP5 Model Analysis

5-9 March 2012

Honolulu, Hawaii, USA

*<http://cmip5.wcrp-climate.org/workshop>*

The workshop is organized by the WCRP/CLIVAR Working Group on Coupled Modeling (WGCM) and is hosted by the International Pacific Research Center (IPRC) at the University of Hawaii.

Short-presentation/poster format; the workshop will consist of a series of half-day sessions. Each session will begin with presenters in that session given three minutes to show no more than one slide summarizing the main conclusion; the rest of the half day session will consist of viewing the posters of that session.

Attendance and participation will be limited by the size of the venue (approximately 150 people) and format of workshop.

Submitted abstracts will be reviewed by Program Committee and priority will be given to multi-model CMIP5 papers.

Timeline:

November 14 2011 - Abstract submission opens

December 14 2011 - Deadline for abstract submission

End December 2011 - Notification of accepted abstracts

5-9 March 2012 - Workshop, Honolulu
