About WCRP

The World Climate Research Programme (WCRP) leads the way in addressing frontier scientific questions related to the coupled climate system — questions that are too large and too complex to be tackled by a single nation, agency or scientific discipline. Through international science coordination and partnerships, WCRP contributes to advancing our understanding of the multi-scale dynamic interactions between natural and social systems that affect climate. WCRP engages productively through these partnerships to inform the development of policies and services and to promote science education. WCRP-supported research underpins the United Nations Framework Convention on Climate Change, and contributes to the knowledge that supports the 2030 Agenda for Sustainable Development. It is the international forum for thousands of climate scientists around the world.

Why should you support the WCRP Open Science Conference 2023?

By sponsoring the OSC, you will acknowledge the vital nature of climate research in support of a sustainable future, and help foster innovative ways to bridge science and society and build future climate science leadership around the world. This event, at the heart of the African continent, will also allow strong engagement with research communities, stakeholders and practitioners from Rwanda and the broader region.

Who will participate?

Science leaders, policy makers and stakeholders will share their ideas on how climate research can lead to a sustainable future.

Early career scientists, senior scientists, and practitioners from around the world will showcase their work, learn from each other, and invent new ways to work together to build the future we want. We anticipate 1500 delegates on site and an equal number who will connect remotely.

Will this be a “green” event?

Rwanda is an emerging leader in global environmental governance and is committed to providing an outstanding opportunity to deliver a green WCRP OSC 2023. Rwanda has chosen a green growth pathway where environment and climate action sit at the heart of national planning towards sustainable development.

Who is the local host?

The Rwanda Environment Management Authority (REMA), on behalf of the Government of Rwanda, will host the WCRP OSC 2023 in Kigali, at the Kigali Convention Centre, and will support WCRP to deliver a state-of-the-art hybrid event working together with many local and regional partners, including the Rwanda Meteorology Agency, the University of Rwanda, the African Institute for Mathematical Sciences, and Carnegie Mellon University Africa.

Sponsorship Benefits

Platinum Sponsors

(\$50,000 contribution)

- Invitation to attend the sponsor dinner
- Complimentary premium exhibit booth space
- 4 complimentary conference registrations
- Recognition from the podium at the opening session
- Short description on the hybrid platform
- Banner logo on conference web page
- Logo on presentation screens in general session room between talks
- Link to organization web site from meeting web site
- Logo on stage signage
- Logo on Conference Center reader boards

Gold Sponsors

(\$25,000 contribution)

- Complimentary premium exhibit booth space
- 2 complimentary conference registrations
- Short description on the hybrid platform
- Banner logo on conference web page
- Logo on presentation screens in general session room between talks
- Link to organization web site from meeting web site
- Logo on stage signage
- Logo on Conference Center reader boards

Silver Sponsors

(\$10,000 contribution)

- 2 complimentary conference registrations
- Banner logo on conference web page
- Logo on presentation screens in general session room between talks
- Link to organization web site from meeting web site
- Logo on stage signage

Bronze Sponsors

(\$5,000 contribution)

- 1 complimentary conference registration
- Logo on presentation screens in general session room between talks
- Link to organization web site from meeting web site
- Logo on stage signage

Deserving Participant Support Opportunities

There are many deserving students, early career scientists, under-represented minorities, and scientists from developing nations around the world who would benefit greatly from participating on site at the WCRP OSC 2023 but are unable to travel because they lack financial support. Contributions for named scholarships for participation in the conference are another way to support the WCRP OSC 2023.
