

Climate and Cryosphere GC on Melting Ice & Global Consequences

Extraordinary Session 41b of the WCRP Joint Scientific Committee
30 Nov - 3 Dec

James Renwick, Fiamma Straneo, Jason Box

Dec 1, 2020

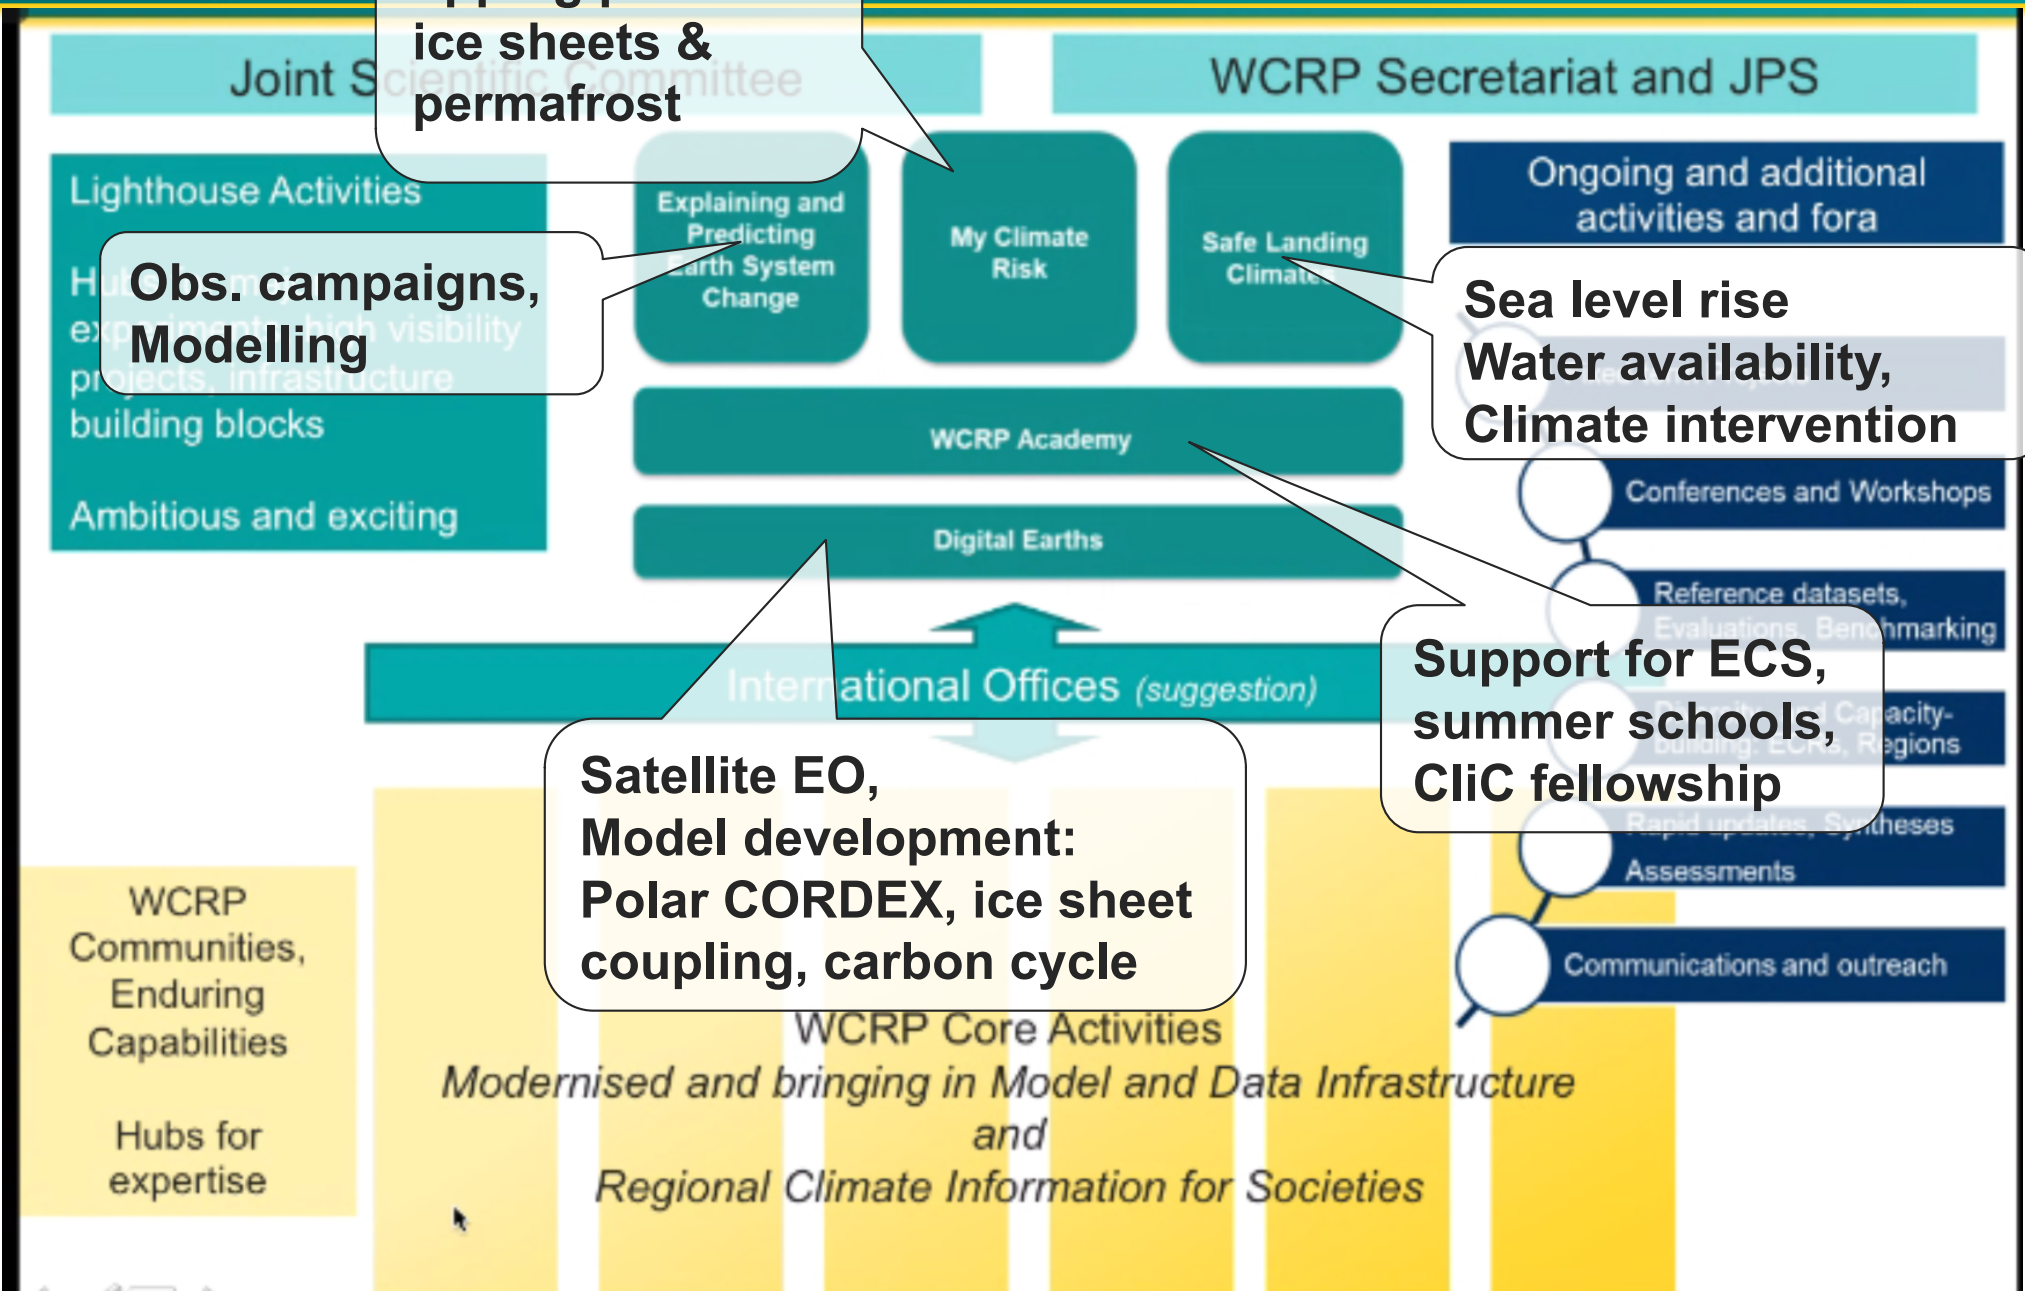

Online

International
Science Council

New WCRP structure

Progress/Issues

- Progress has been slow this year
 - Negotiations over IPO, staff changes, busyness
 - Discussions with SSG but need to engage better
 - CliC has been somewhat introspective
- Better engagement with partners
 - IASC, SCAR and others
- Increasing diversity
 - Under-represented nations
 - Early career researchers
 - Gender diversity

Future

- CliC nominees for new WCRP structure
 - Digital Earth, My Climate Risk, Safe Landing Climates
- Regional focal points
 - Asia/Oceania, South America
- A need for more engagement with the CliC community
 - SSG and wider research community
 - LHAs and new structure a great vehicle for this
 - Important to preserve work under the Melting Ice GC
