

WGSIP-led workshop possibilities

- Topic
 - 1) Ensembles 2020 (or 2021): information from forecast ensembles: unprecedented extremes, forecast extremes, calibration
 - 2) ...
- When: Fall 2020 or spring 2021
- Where
- How big?
- Partners?

The Large Ensembles Workshop

July 24 – 26, 2019

Boulder, Colorado

REGISTRATION INFORMATION

Registration Fees

General Registration: \$200
Early Career Scientist: \$100
Federal Program Sponsor:
\$200

Fostering usage of large initial-condition ensembles with Earth System Models to advance understanding of natural climate variability, anthropogenic climate change, and their impacts.

Objectives

Identifying anthropogenic influences on weather and climate amidst the “noise” of internal variability is a central challenge for the broad climate research community.
