

The Young Earth System Scientists (YESS)

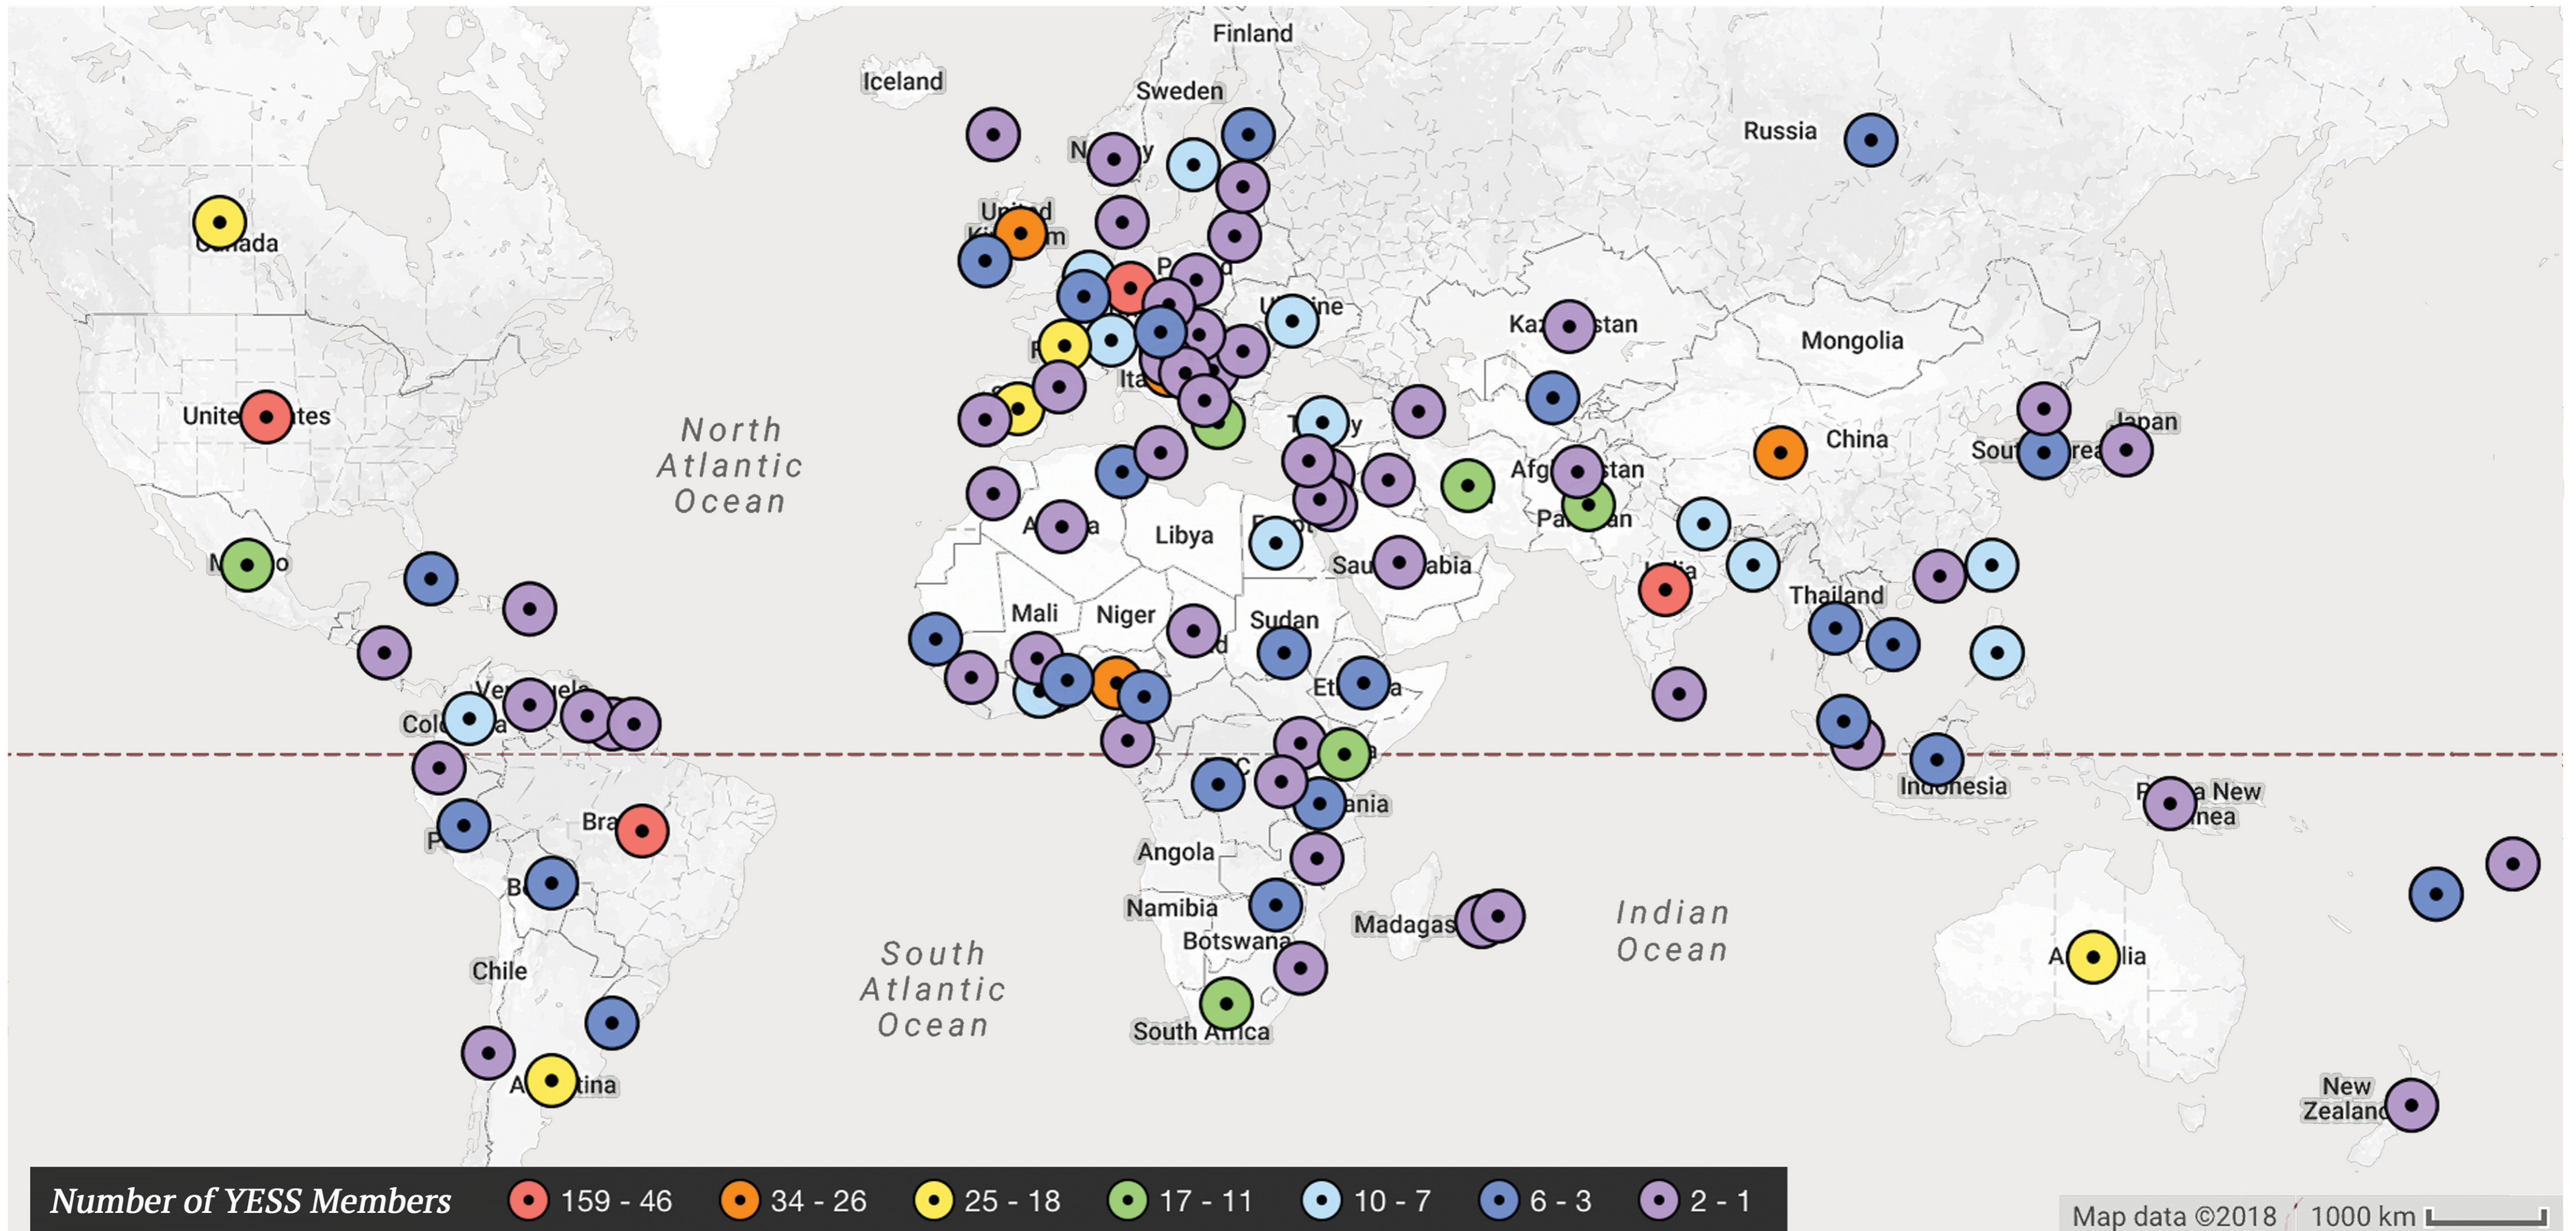

a unified international multidisciplinary early career researchers network

“The Earth system science community has accepted the challenge of creating tangible products for the benefit of society. A coordinated, interdisciplinary and truly global approach is the best means to develop applicable tools to confront the challenges facing society, both now and in the future.”
(adapted from YESS White Paper 2016)

YOUNG
EARTH SYSTEM
SCIENTISTS
community

YESS Members : More than 1000 members in 110 Countries

YESS STRUCTURE

As young scientists, we have a critical role in shaping the future of Earth system science.

YESS welcomes members from a range of scientific backgrounds, creating a synergy between researchers in natural and social sciences who represent the future of earth system science.

YESS serves as a powerful partner with prominent international organizations:

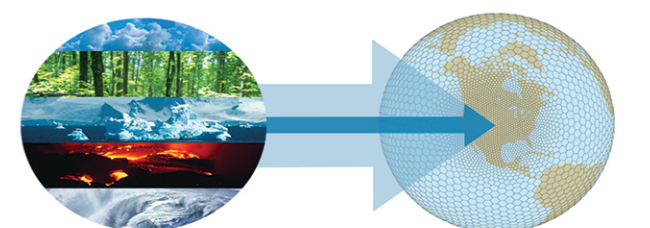

YESS community is focused on early career researchers (PhD candidates, Postdocs within 5 years after PhD, or Masters students) in the Earth system sciences.

Earth System Science Frontiers in the 21st century Defined by YESS as

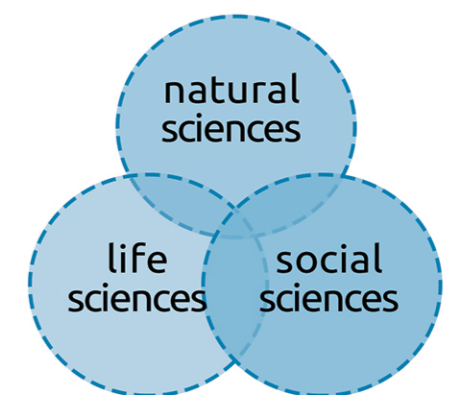

User-driven science

Scale-aware & seamless predictions

Interdisciplinarity

Robust communication

If you are a Ph.D. student, Postdoc or an active master student and are interested in joining our network
